

XTR Altima

Refrigerant Recovery Machine

JAVAC's innovative XTR Altima provides the user with a tool that offers more features and benefits that most other products simply cannot match.

Features and Capabilities

The XTR Altima features a quiet AC compressor with a high recovery capacity and capabilities for most refrigerants, including R410a. Boasting the additional attribute of a high torque AC motor which provides up to 50% noise reduction and increased vapour speed, it ensures the residual vapour moves faster and delivers results quicker.

True multi purpose recovery of R12, R134a, R22, R401, R404, R406, R408, R410A, R411, R412, R500, R502, R509. In fact, a whole range of CFC's, HCFC's and HFC's with blends and A & B variations of most.

The XTR Altima includes a comprehensive built in manifold that puts control in your hands for vapour, liquid or combined recovery. In addition, fully automatic pressure regulation gives you the capability to tweak the manifold for optimum performance. Purge and self cleaning is on the fly, there is no need to shut down. You can flush, push pull and sub cool by using this advanced facility. This unit also features an integrated low pressure control so you can leave the unit operating and continue with other work knowing that the unit will cut out automatically when it reaches zero pressure.

The high performance condenser with fan forced cooling allows you to recover with confidence - especially on those extremely hot days.

And More...

Ergonomic design means the XTR Altima is easy to carry. Built in safety features include; cool to touch, refrigerant connections that point down away from your eyes, safety switches, thermal overloads, circuit breakers and convenient connection points all on one side of the unit.

Needless to say, the XTR Altima has all the bases covered and is built to stringent Australian standards for quality and performance.

TECHNICAL SPECIFICATIONS

Key Features

- 0.3 Kw motor
- Weight: 11kg
- Size:
 - 420mm (L)
 - 290mm (W)
 - 420mm (H)
- Light weight 1/2 HP compressor
- Oil free compressor
- Ceramic bearings
- Automatic shut off
- Integrated self purge
- High power fan cooling
- Integrated low pressure control
- Low pressure control manual override
- Purge Facility
- HP and LP gauge fully enclosed
- Integrated circuit breaker protection
- High capacity condenser
- Connection fittings 1/4 SAE
- Recovery hose included

Additional Features

- Recovers most refrigerants
- Easy to clean inlet filter
- Robust blow moulded case
- Two year warranty
- Australian designed
- Australian manufactured

2 year warranty

Designed and Manufactured
in Australia.
