

01 Dwyer releases its model Emma

Dwyer Instruments has released its new model Emma – Environmental Multifunction Meter.

The model Emma multifunction meter measures humidity, temperature, air velocity, air flow, sound and light measurements.

The dual-line, 4-digit LCD display shows both the current and average reading. For reading measurements in dimly lit areas, the display has a built-in back light.

The model Emma also allows the user to read the minimum, maximum and differential measurement for each of the parameters.

Included with the meter is a carrying case, battery and tri-pod.

02 Fieldpiece releases new digital manifolds

Fieldpiece has released the SMAN2 and SMAN3 digital manifolds.

According to the company, the manifolds automatically calculate target superheat and perform a linear adjustment of the pressure sensors based on refrigerant type, temperature and pressure.

Other features include a multi-line, temperature-resistant backlit display, accurate and fast reacting thermocouples and built-in PT charts.

The SMAN3 also features a built-in micron gauge and alarm with resolution from 50 to 9,999 and a vacuum stopwatch.

Batteries last for 500 hours on the SMAN2 and 135 hours on SMAN3.

For more information, visit www.fieldpiece.com.au ■

The T10 can be upgraded with Fluke's IR Fusion to convert it to a full featured Fluke Ti10 thermal imager with advanced analysis and reporting. IR-Fusion shows a full thermal image, or one combined with a visual image to pinpoint potential faults.

04 Heatcraft's annual price guide

Heatcraft has released its 2011 price guide, which in addition to its range of products also includes capacity tables, product specifications, maintenance kits and tips.

The guide features a colour-coded fast find index and a detailed product and brand index.

The 2011 price guide can be downloaded at www.heatcraft.com.au ■

05 JAVAC adds new service packs to the line-up

Due to the popularity of JAVAC's refrigeration service packs, the company has released several new kits.

The company now offer the complete refrigeration service pack; which includes a CC81 vacuum pump, XTRpro recovery unit, Tek-Mate leak detector, CC vacuum gauge and a manifold set.

The split service pack comprises of a CC45 vacuum pump, Tek-Mate leak detector, Procharge scales and manifold.

For recovery and charging, the PCS2 service pack features a PCS2 charging machine, XTRpro recovery machine and a Tek-Mate leak detector.

According to JAVAC, these service packs are suitable for those just starting out, or wanting to expand an already equipped service team.
